Feathers Softwares,Nagercoil. **Date : June - July 2025**

Duhzine IT Solutions,Chennai. **Date : August - October 2025**

PROJECTS

- **MechLink – Streamlining Vehicle Maintenance Journey**

Designed a vehicle maintenance mobile application using UI/UX principles, including user research, wireframing, prototyping, and interaction design, to create an intuitive, accessible, and responsive user experience with real-time communication features.

- **CivicVoice – Public Grievance Website**

Created a civic grievance reporting website using UI/UX principles, featuring photo uploads, geotagging, category selection, and real-time issue status tracking for easy citizen reporting.

- **Evolve – Employee Management**

Designed an employee management and attendance dashboard with task tracking, leave management, analytics, and real-time performance insights, supporting light mode, dark mode, and focus mode using UI/UX principles.
